

**ZOMG!!!!!!**

**HAPPY  
THURSDAY!!**

**WELCOME TO  
RubyConf X!**

# **X-TREME RUBYCONF!!!!!!**

# Aaron Patterson

**WWFMD?**

# Performance

# ARel

# Rails

# Prepared Statement Caching

**DEEPER**  
**UNDERSTANDING**  
**REQUIRED**

**ActiveRecord 5x  
slower than Rails  
2.3.5**

<http://bit.ly/omgs1ow>

**5x Slower?!?**

**WTF?**

**Yes, 5x Slower**

**What could possibly  
go wrong?**

# Motivation

**Why do you care  
about speed?**

# Scaling Ruby

```
query_methods.rb (~/.git/rails/a...lib/active_record/relation) - VIM1

    arel.join(join)
  end

  arel.joins(arel)
end

def build_arel
  arel = table

  arel = build_joins(arel, @joins_values) unless @joins_values.empty?

  (@where_values - []).uniq.each do |where|
    where = Arel.sql(where) if String === where
    arel = arel.where(Arel::Nodes::Grouping.new(where))
  end

  arel = arel.having(*@having_values.uniq.reject{|h| h.blank?}) unless @having_values.empty?

  arel = arel.take(@limit_value) if @limit_value
  arel = arel.skip(@offset_value) if @offset_value

  arel = arel.group(*@group_values.uniq.reject{|g| g.blank?}) unless @group_values.empty?

  arel = arel.order(*@order_values.uniq.reject{|o| o.blank?}) unless @order_values.empty?

  arel = build_select(arel, @select_values.uniq)

  arel = arel.from(@from_value) if @from_value
  arel = arel.lock(@lock_value) if @lock_value

  arel
end

query_methods.rb [2] 0-1, 195 of 267, (4572) 71% 0x0 (0)
```

**When should I make  
my code faster?**

**When it isn't fast  
enough.**

**What is  
"fast enough"?**

# Do people notice it?

**In comparison to?**

**Finishes in a  
reasonable amount  
of time.**

**Don't believe me.**

**Think Critically**

# For Performance:

# Things To Reduce

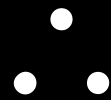

- **Method calls**
- **Branching and looping**
- **Objects (memory consumption)**

# For Clean Code:

# Things To Reduce

- **Method calls**
- **Branching and looping**
- **Objects (memory consumption)**

**(therefore)**

# Clean Code

**==**

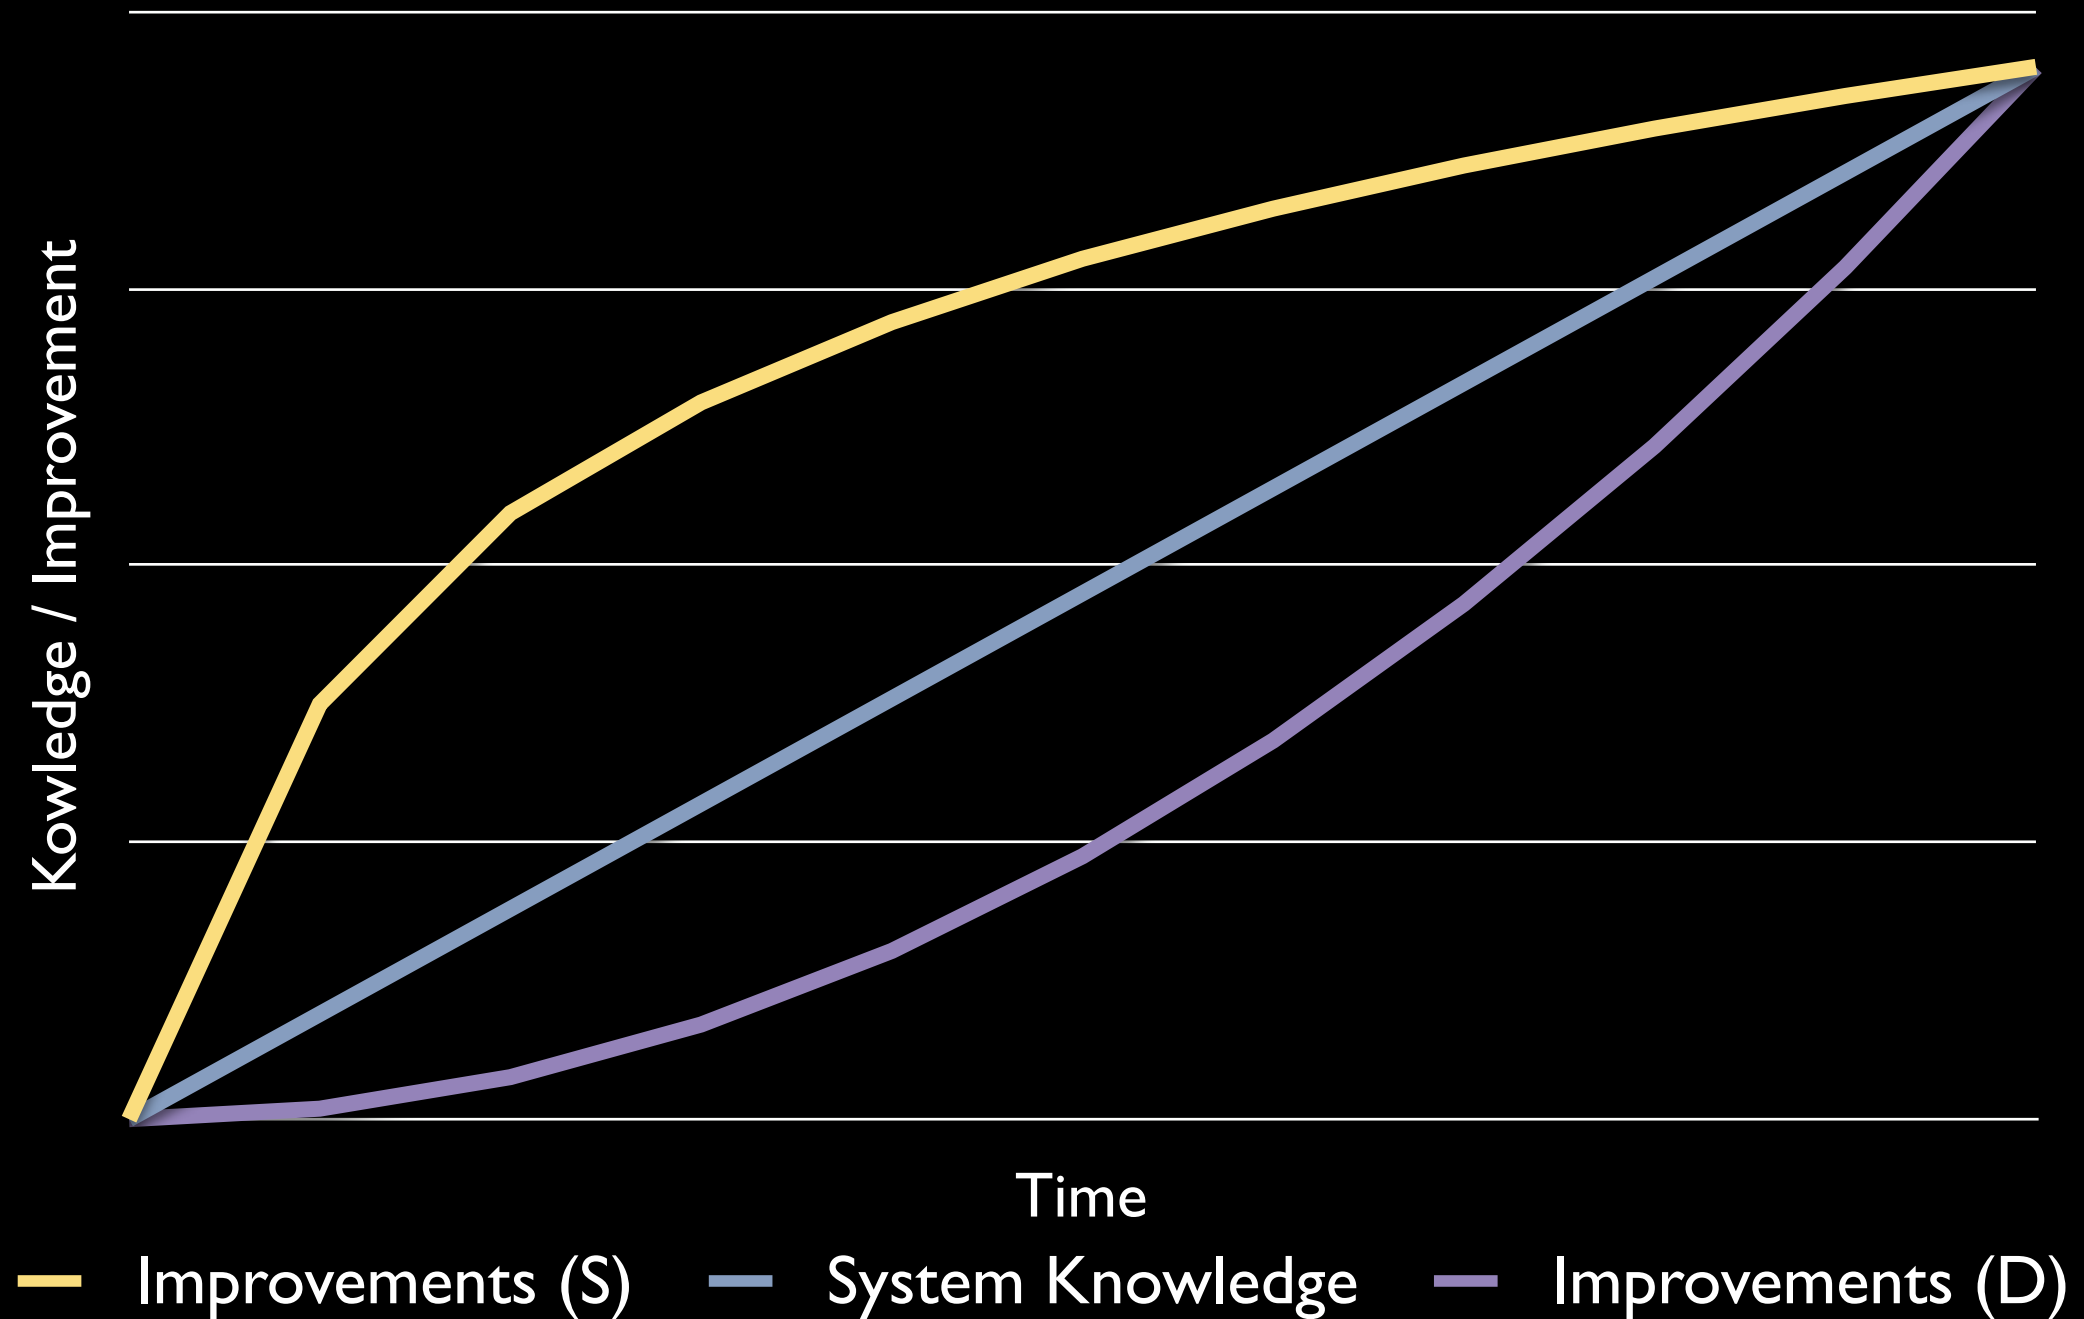

# Performant code

# Conclusion

# **AKA:**

# **Things I've Learned**

# System Impact

# When Should I Rewrite?

# Rewrite Timeline

---

# Rewrite Timeline

---

We emphasize  
**the art**  
of Code

We should not forget  
**the Science**
